TABLE OF CONTENTS

INTRODUCTION

- ❏ Our project is about Inventory Management called Flow Track
- ❏ It is mainly focused for small businesses
- ❏ Track items
- ❏ Know the statistics of inventory
- ❏ System can help managers/store owners to reduce the losses

EXISTING SYSTEM

❏ In the existing system, convenience store owners were not able to keep the track of the items that they are buying, and keeping it on the shelf from the backroom.

❏ There was a issue about the product that gets expired. There was a huge loss due to this.

TOOLS & TECHNOLOGY

- ❏   React Js
- ❏   Node Js
- ❏   Google Firebase DB

DEMO - Firebase NoSQL database
